Objective

Motivated B.Tech student with a strong foundation in Python programming and data analytics, seeking an opportunity to apply technical skills in a challenging internship or entry-level role. Passionate about transforming raw data into meaningful insights and building practical software solutions.

Education

Sri Venkateswara College of Engineering

Tirupathi

2023 – 2027

B.Tech

Currently pursuing Bachelor of Technology with a strong academic record.

CGPA

8.20

Technical Skills

Programming Languages

Python, SQL

Data Analytics

Pandas, NumPy, Matplotlib, Seaborn

Databases

MySQL, SQLite

Tools & IDEs

VS Code, Jupyter Notebook, Google Colab, Git & GitHub

Other

Microsoft Excel, Data Cleaning, Exploratory Data Analysis (EDA), Basic Statistics

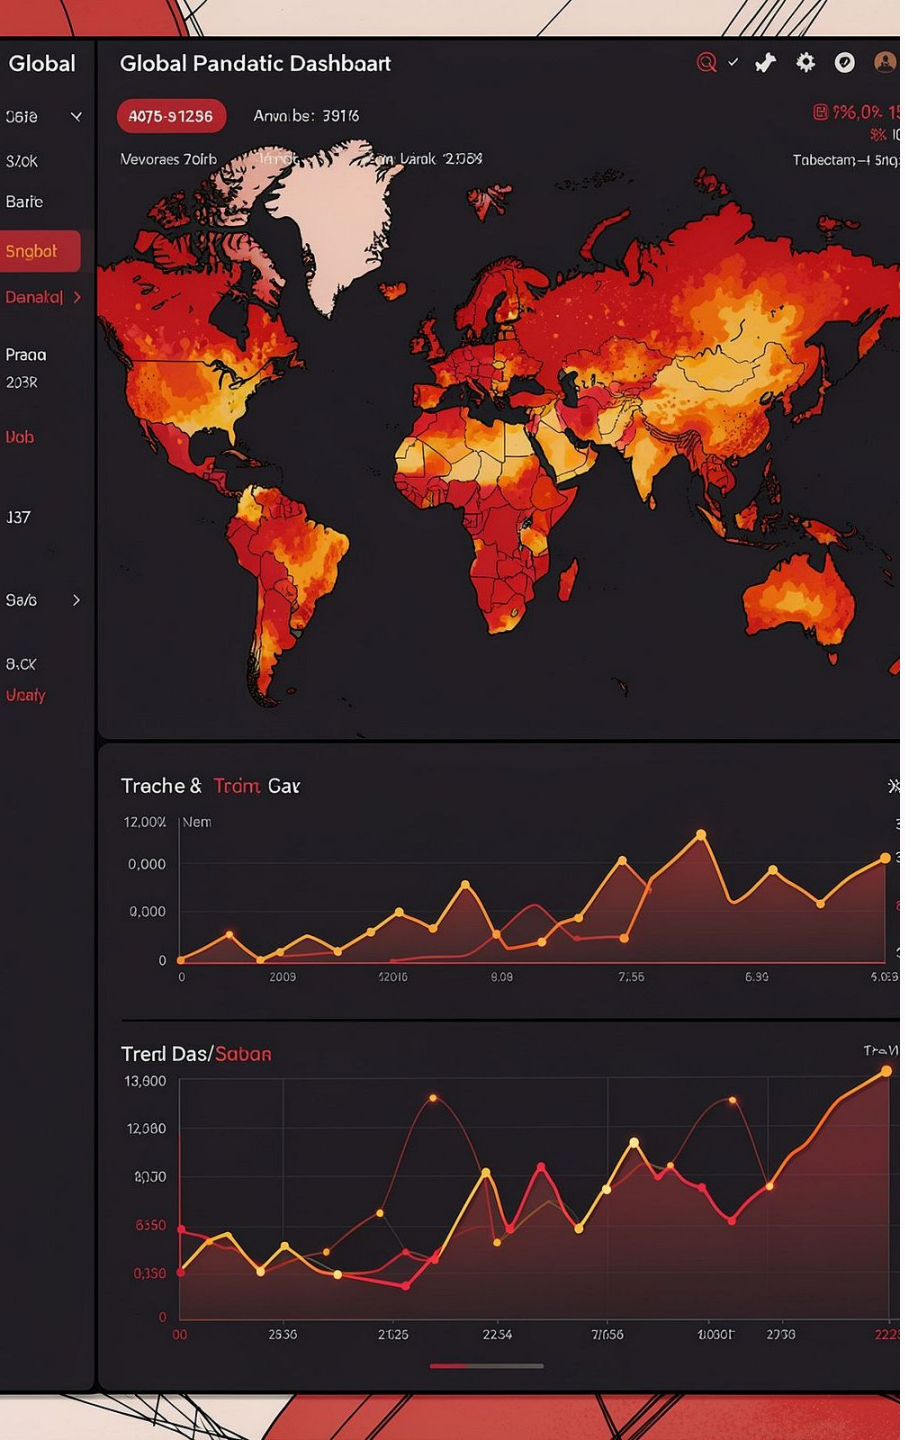

PROJECT 01

Student Grade Analyzer

Python · Pandas · Matplotlib

Built a Python application to read student marks from CSV files and compute grade statistics. Generated bar charts and pie charts to visualize subject-wise and overall performance. Implemented pass/fail classification logic and exported summary reports to Excel.

PROJECT 02

COVID-19 Data Analysis Dashboard

Exploratory Analysis

Performed EDA on a public COVID-19 dataset covering 50+ countries.

Data Cleaning

Cleaned and transformed raw data, handled missing values, and normalized columns.

Visualization

Created trend-line charts, heatmaps, and bar graphs to visualize case/death rates over time.

PROJECT 03

Personal Expense Tracker

Python · SQLite · Tkinter

Developed a desktop GUI application to log daily expenses categorized by type (food, transport, etc.). Stored transaction data in a local SQLite database for persistent record-keeping. Displayed monthly summaries and category-wise spending using Matplotlib charts.

PROJECT 04

Sales Data Analysis Tool

Trend Identification

Analyzed a retail sales dataset to identify top-performing products and seasonal trends.

Aggregations

Applied groupby aggregations and pivot tables to compute region-wise revenue comparisons.

Business Insights

Produced a final insights report with annotated visualizations highlighting key business metrics.

Certifications

Python for Everybody

Coursera — University of Michigan

Data Analysis with Python

freeCodeCamp

Introduction to SQL

Khan Academy

Foundations of Data Science

Google — Coursera

Extra-Curricular Activities

Coding Contests & Hackathons

Active participant in college-level coding contests and hackathons.

Technical Club

Member of the college technical club, contributing to peer-learning workshops.

Open Source

Completed online open-source contributions on GitHub involving Python scripts.
